Farmers Use Experiment Station.
The use which farmers are making of the University of Missouri Agricultural Experiment Station is indicated by the correspondence received by that institution. The annual report for the fiscal year which ended June 30, 1917, shows that the station answered directly 24,341 letters during the year. In addition, the office of the director received 36,985 letters and cards. Many of these were requests for bulletins. A large number were inquiries which concerned the various technical departments and were referred to the proper department for reply. The others for the most part were letters concerned with the administrative work with the station and the College of Agriculture. The report states that the correspondence of all officers is steadily increasing.

Stop Look

Do not be fooled by an old game. Do not let them get your money.

A few months ago a Western Baking Powder Company was perpetually enjoined by the U. S. Federal Court for the District of Idaho, from fooling the people of Idaho with

The Fake (Comparative) Water Glass Test

Now an Eastern Baking Powder Company is trying to fool the people with the same old fake water glass test. The object is to get your money.

Are you going to let them get it?

Be wise—ask your grocer—He will tell you how the fake test is worked. He will advise you to save your money and buy an honest baking powder which contains no albumen, (sometimes called white of egg).

K C BAKING POWDER contains no albumen or any adulteration. It is made right and keeps right—Pure—Efficient—Legal—No Fake Test.
